New movers to an area are actively looking for new places to shop and vendors to buy from. They are open to trying new things when setting up their living situation. Our system has a live feed of data and connects you to these movers within hours, allowing you to sit back and target them the second their information becomes available. 450,000 people move every week in the United States. Most new home purchases are made in the 30-day window before and after moving. These consumers are also more likely to purchase multiple items, due to their recent lifestyle change. Studies have shown that once this consumer audience buys from you, they are 90% more likely to become a repeat customer.

**NEW MOVERS**

- Presence of children
- Single vs. married
